DETAILED ACTION

Response to Arguments

1. Applicant's arguments with respect to claims 27 & 29 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 27-30 are rejected under 35 U.S.C. 103(a) as being unpatentable over Budow, (U.S. Pat # 5,661,517), in view of Handelman, (U.S. Pat # 5,774,527).

Considering claims 27 & 29, Budow is directed to a VOD demand system that a user accesses using a phone network. The claimed jukebox for transmitting video data reads on the video unit 3, col. 9, lines 14-60. However, even though Budow teaches that the system may interact with a PBX system, the claimed PABX is not explicitly disclosed. Handelman is directed to a system that enables a user request various types of audiovisual content over a telephone

network, such that the content is delivered over a CATV or TV network; Abstract; col. 4, lines 46-60 & col. 5, lines 21-35. As for the amended claimed feature of the system operating over a PABX network, Handelman also discloses such a technology, col. 4, lines 31-40.

Thus, it would have been obvious for one of ordinary skill in the art at the time the invention was made to modify Budow with a PABX as disclosed by Handelman, at least for the known benefit of only allowing the subscribers to call within the private exchange to request programming.

Thus Budow and Handelman discloses all subject matter, including the amended claimed dedicated channel. In particular Budow teaches the room terminal communicating with the system control computer 4 over the carrier frequency of 13 MHz, col. 15, lines 25-32.

As for claims 28 & 30, the customer ID and billing data may be transmitted over the PBX of Budow (col. 10, lines 1-8) or PABX of Handelman (col. 4, lines 4-40).

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
